

“Territorial Justice - a new paradigm for the development of a country”

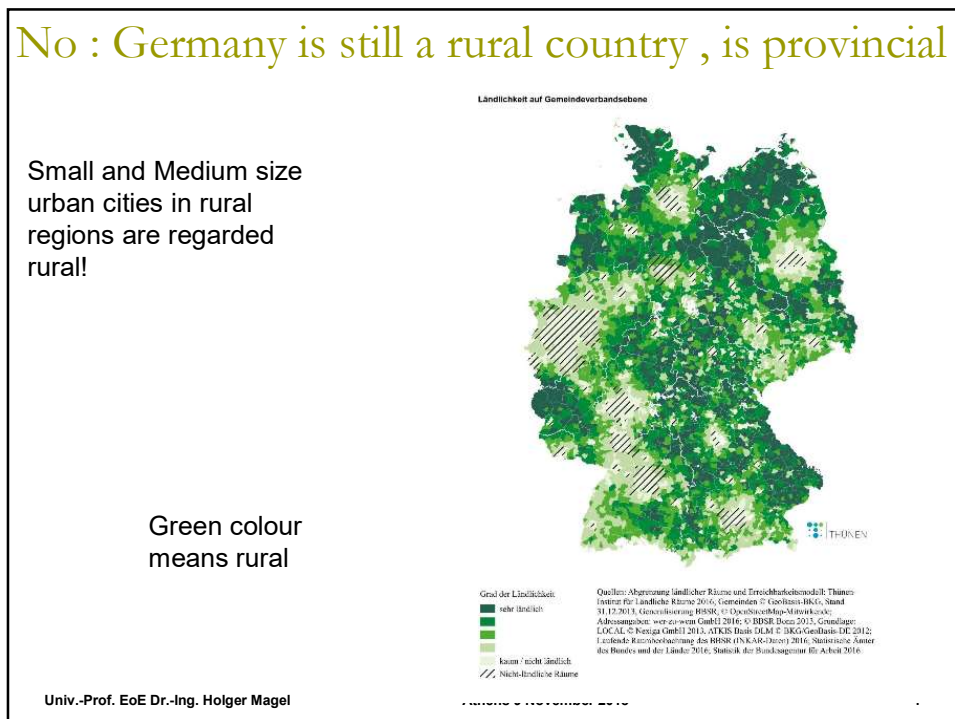

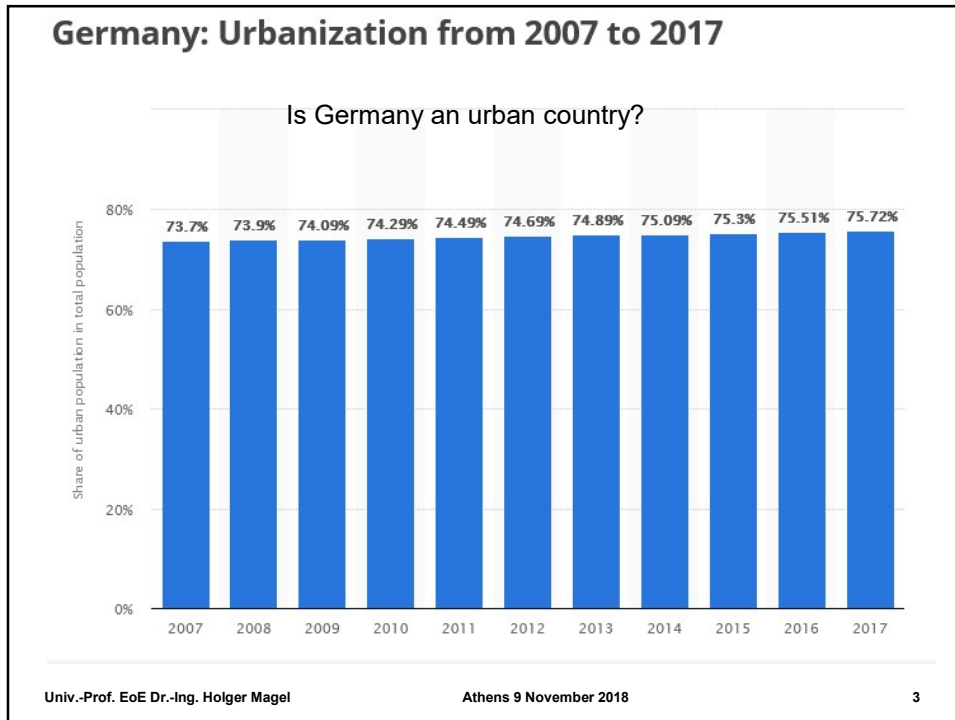

Athens , 9 November 2018
Univ. Prof. EoE Dr. - Ing. Holger Magel
FIG Honorary President
President of Bavarian Academy for Rural Areas

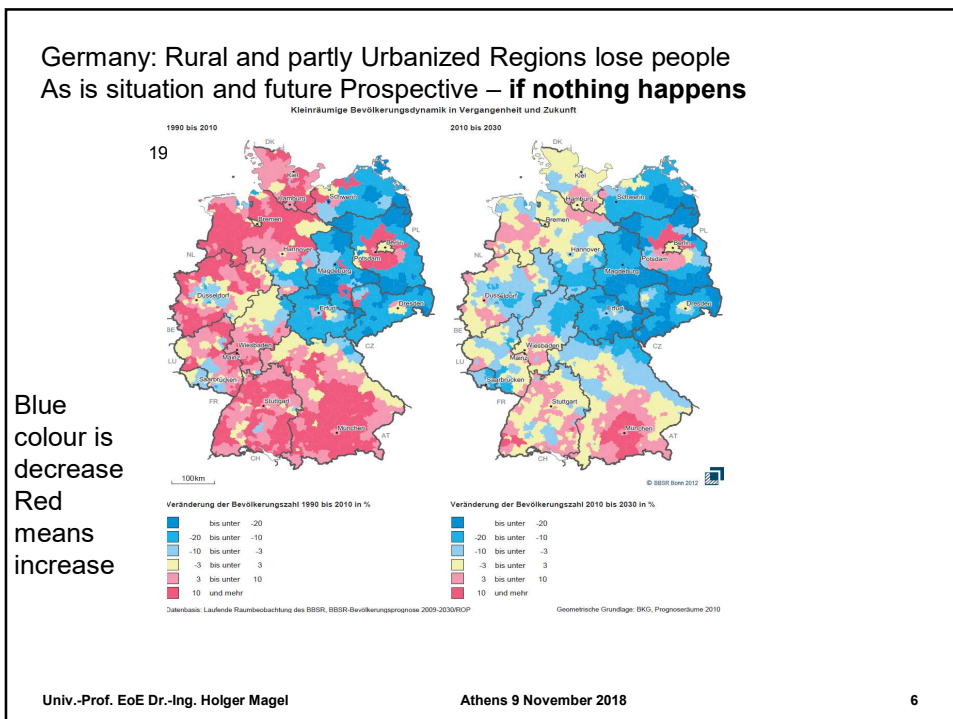

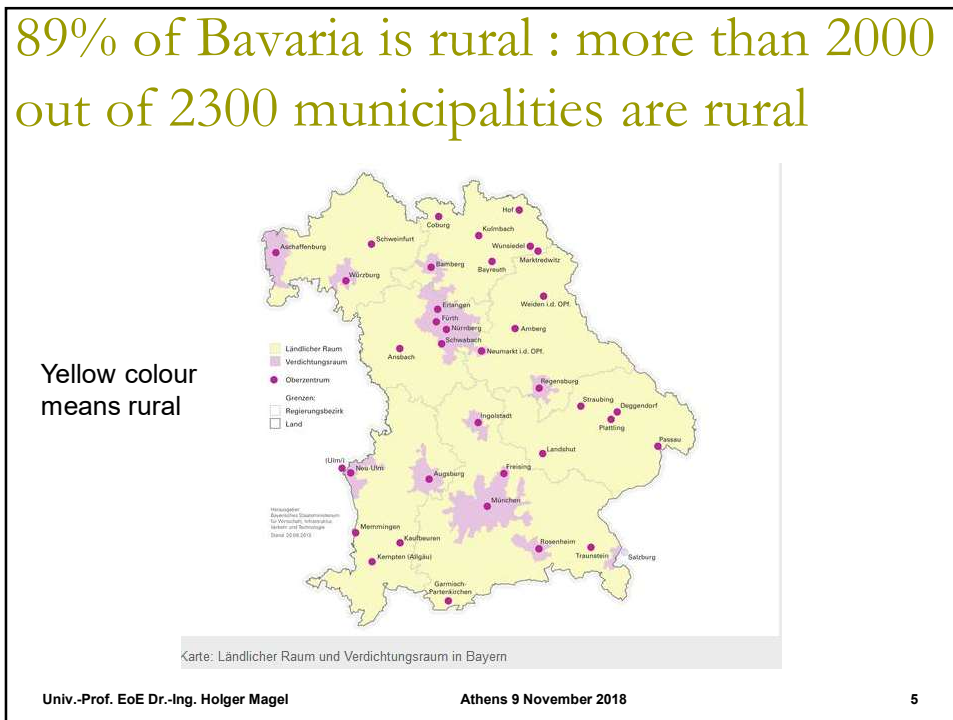

Univ.-Prof. EoE Dr.-Ing. Holger Magel Athens 9 November 2018 1

Megatrend: „Humanity is turning from a rural to an urban species. Global urbanization is seemingly unstoppable worldwide“ (E.U.von Weizsäcker ,Vicepresident Club of Rome)

Do we have a common understanding of urbanization
What means urbanization really?

2

Not only in Germany!!!

The screenshot shows an OECD website page with the following content:

- Header: OECD Home | About | Countries | Topics | Français
- Search bar: Search oecd.org
- Breadcrumb: Regional inequalities worsening in many countries
- Section Header: **Regional inequalities worsening in many countries**
- Date: 16/09/2016
- Text: "Income inequality is worsening within many countries, and regional disparities in housing, safety and air quality inside countries are also growing wider in many cases, according to a new OECD report."
- Text: "OECD Regions at a Glance 2016 finds most countries are closing the gap between regions in education and Internet access, but disparities in GDP per head, disposable income, safety and air pollution are widening in many. The disposable income per capita gap between the richest and poorest parts of OECD countries grew 1.5% a year on average over 2000-13, with the biggest increases in the Slovak Republic, Australia, Czech Republic and Canada."
- Text: "The report, which examines local-level indicators in over 40 countries, shows many regions are struggling to increase the productivity of firms and people and restore employment. Italy, Spain and Turkey all show a 20 percentage point gap between highest and lowest regional unemployment rates, the same difference as between the national unemployment rates of Greece and Norway."
- Text: "Understanding the regional inequalities hidden behind country averages can help us to improve well-being and prosperity at a national and global level, in line with the Sustainable Development Goals," said OECD Deputy Secretary-General Mari Kiviniemi, presenting the report at the European Committee of the Regions 118th Plenary Session. "We need a full dashboard of indicators and our job is to get them all moving in the right direction."

East Germany Ifo Expert: „We should close some villages“

Die Politik hat im Osten viele Fehler gemacht, sagt Joachim Ragnitz vom Ifo-Institut in Dresden. Er rät zu Prämien, damit die Menschen in die größeren Städte

Univ.-Prof. EoE Dr.-Ing. Holger Magel | Athens 9 November 2018 | 8

German and Bavarian Governments and Parliaments don't accept and use such wording of some scientists and economists. Why not?

Because it is **against human dignity and human rights, against justice and fairness, against good government.**

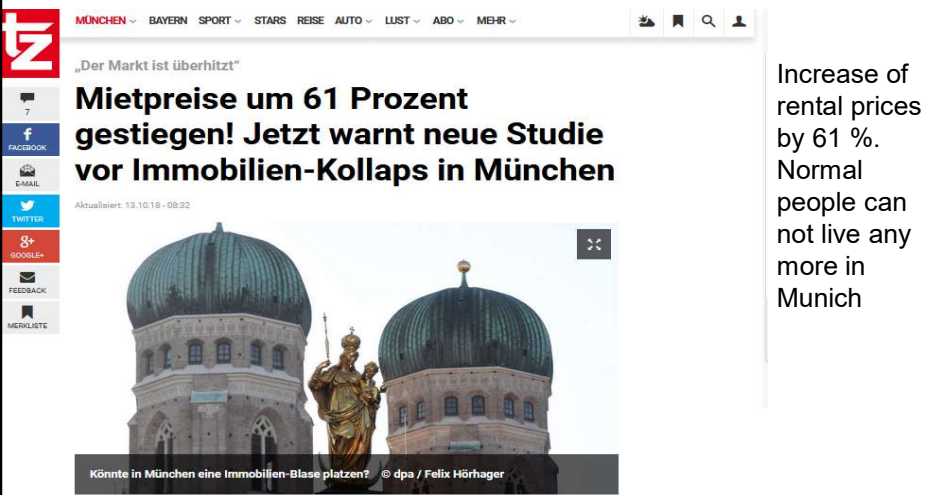

It is bad governance when cities are collapsing and rural areas become empty.

What say the SDG ???

A Better Life in Rural Areas

Considerations

- Having met at Cork, Ireland from 5th to 6th September 2016
- Building on the 1996 Cork Declaration – "A living countryside" – developed by the participants of the European Conference on Rural Development in Cork, Ireland;
- Considering the key role of rural areas and communities in implementing the United Nations Sustainable Development Goals (SDG) as well as the conclusions of the 21st annual Conference of the Parties (COP21) to the United Nations Framework Convention on Climate Change (UNFCCC);
- Aware of the economic, environmental and social diversity that characterises Rural Europe – which is home to more than half of the EU population and covers more than three quarters of the territory – and the importance of rural areas in the preservation of Europe's manifold natural and cultural landscapes and heritage;

COMMENT

RESEARCH Tales of American cartographers, past and present p.28

RESEARCH When hypotheses are hard to research p.29

RESEARCH Innovation lessons from the US food research programme p.30

COMMENT Comment should be confirmed before writing p.30

Revitalize the world's countryside

A rural revival is needed to counter urbanization across the globe, say **Yansui Liu and Yuheng Li**.

Urbанизация gets a lot of attention. Most countries are expanding their cities. In China, for example, these trends are well large. Last year alone, nearly 170 million

have behind are embedded. Fragmented families struggle to sustain small farms. In China, 2 million hectares of agricultural land fall out of production each year. In 2015, migrants left behind 40 million children, 47 million women and 50 million elderly people in their home villages. More than two-thirds of China's rural primary schools have closed in the past 25 years. Suicide rates among older people in rural parts of the country (at 47 deaths per 100,000 people) are the highest in the world.

Rural decline is a global issue (see "World rural populations"). From the United States and Sweden to sub-Saharan Africa, the rural-urban divide is widening. Cities attract the lion's share of government funding, private investment and even research. For instance, since 1980, cities have received more than 70% of China's total public and private investment in fixed assets. The consequences are especially dire in poor nations, where migration is driven by survival rather than by opportunity. Slums in cities such as Port Harcourt in Nigeria, Mumbai in India and Mexico City are expanding as poor and uneducated rural workers move in to seek their fortunes.

For the past decade, we have been studying how land uses can be leveraged to improve rural lives and economies in China (see "China's challenge"). For example, projects to enhance soil fertility and manage flooding have boosted agricultural yields and incomes in the western Loess Plateau areas. Our research and work by others suggest that it is possible to rebuild rural villages and towns by improving infrastructure, developing local resources and cultivating tourism, special products and crafts. Lessons can be learnt from some countries' policies that have looked the trend.

Policymakers and researchers must shift their attention and effort to rebalance policies that are biased towards cities. Scientific methods such as big data surveillance and analysis are needed to monitor rural

Univ.-Prof. EoE Dr.-Ing. Holger Magel

Athens 9 November 2018

Chinas President Xi Jinping:

„As long as rural areas, especially their poor parts lag behind the rest of the country so long we can not talk about having reached a society with modest wealth“

(see his book Governance in China I)

We should take care of both : urban and rural -it is a demand of justice and political wisdom in the light of a growing spatial divide

**Themenwoche Gerechtigkeit
11. bis 17. November 2018**

Monday 12 November 18.00h Bavarian TV
Evening News : Prof. Magel is studio guest and talking about equivalent living conditions

German President Frank Walter Steinmeier is more and more concerned about the spatial divide and the endangered cohesion of society

Justice is a hot topic everywhere

Sen's Capability Approach

The Capability Approach is defined by its choice of focus upon the moral significance of individuals' capability of achieving the kind of lives they have reason to value. This distinguishes it from more established approaches to ethical evaluation, such as utilitarianism or resourcism, which focus exclusively on subjective well-being or the availability of means to the good life, respectively. A person's capability to live a good life is defined in terms of the set of valuable 'beings and doings' like being in good health or having loving relationships with others to which they have real access.

The Capability Approach was first articulated by the Indian economist and philosopher Amartya Sen in the 1980s, and remains most closely associated with him. It has been employed extensively in the context of human development, for example, by the United Nations

Is Germany like the gallic village of Obelisk and Asterix which fights with „miraculix“ power against globalisation and demographic trends ?

Article 72 of German Constitution
(2) The Federation shall have the right to legislate on matters**and to the extent that the establishment of equivalent living conditions throughout the federal territory** or....

German Federal Spatial Planning Act
Section 1 : Task and Overall Concept of Spatial Planning

(2) The overall concept of the task laid down in subsection 1 is that of a **sustainable spatial development** which will bring the social and economic demands made on an area in line with its ecological functions and result in a stable order which will be well-balanced on a large scale **with equivalent living conditions in all regions.**

Demand for Justice also in Bavaria :

Art. 3 Bavarian Constitution

.....

(2) The state shall protect the natural basis of life and cultural traditions. **It shall further and secure equivalent living and working conditions throughout Bavaria, in all urban and rural areas**

John Rawls Theory of Justice and Amartya Sen`s and Martha Nußbaum`s Demand for Empowerment:

Some Spatial Unequality is allowed. But there must be a fair compensation between prosperous and less developed regions. That's the role of the state to guarantee this.

Money and esp. distributive justice alone do not help; **empowerment is additionally necessary** in order to enable people using their chances and the financial support in the right way

More Justice for Rural Areas!

Räumliche Gerechtigkeit – Ein Thema für Landentwickler und sonstige Geodäten?!

Prof. Dr.-Ing. Karl-Friedrich Thöne, dem geodätischen Brückenbauer und begnadeten Kommunikator, zum Gedächtnis

Holger Magel

Zusammenfassung
Im Zuge der räumlichen Disparitäten und der oft kontroversen Diskussionen über richtiges politisches und staatliches Handeln geraten die Begriffe gleichwertige Lebensbedingungen und – zwar zurückhaltender – räumliche Gerechtigkeit in das allgemeine Interesse. Der Artikel macht deutlich, dass es eine auf Menschenrecht und Menschenwürde basierende universelle Gerechtigkeitsnorm gibt, die keine Alternative lässt, als weiterhin alles zu tun, um eine gerechte räumliche Entwicklung in allen Landesteilen sicherzustellen bzw. anzustreben. Diese bisher vornehmlich von Geographen, Raumökonomern und Juristen diskutierte Gerechtigkeitsfrage sollte angesichts der beachtlichen raumbezogenen und raumbedeutsamen Beiträge der Geodäsie und hier insbesondere der Landentwicklung...

Univ.-Prof. EoE Dr.-Ing. Holger Magel Athens 9 November 2018 28

The big and quite new challenge :

Which already existing or newly created criteria and indicators do we need and apply for analysing, planning, implementing , monitoring and evaluating territorial justice ?

It`s a very also politically sensitive matter!

Proposals of Commission of Inquiry „Equivalent living conditions in all parts of Bavaria“ :

Indicators for measuring the 4 dimensions of territorial justice

NR	SUBDOMAIN	INDICATOR	DATA
Distributive Justice			
1	Economy and Jobs	GDP	• Average GDP per <u>employee</u>
2		Density of Employees	• Employees per 1000 Inhabitants who are subject to social insurance contribution in current year
3		Development of employees	• Development of social insurance contributed Employees per 1000 Citizens in the last 10 years
4	Income	Available Income per household	• Median of available household income per single person
5	Social Justice	Income distribution	• 90/10 Relation of distribution of available household income
6		Citizens with minimum collateral	• Ratio of recipients of minimum collateral per 1000 citizens
7		Infrastructure of medical doctors	• Ratio of citizens with distances (Public Transfer incl. Taxi) > 10 Minutes to closest general practitioner (Family doctor)
8	Health Care	Provision with pharmacies	• Ratio of citizens ,who live more than 6 km far away to the closest pharmacy
9			
10	Communication Infrastructure	Quality of broadband	• Broadband connectivity quality which is at least available for every household in the region

Univ.-Prof. EoE Dr.-Ing. Holger Magel Athens 9 November 2018 31

Indicators for measuring the dimension

Distributive Justice

10	Communication Infrastructure	Quality of broadband	• Broadband connectivity quality which is at least available for every household in the region
11	Accessibility of local basic infrastructure	Accessibility of shopping possibilities	• Ratio of population which lives more than 1000 m distant to the closest shop with daily basic service
12		Accessibility of primary schools	• Ratio of pupils with public transport on the way to school to closest primary and secondary school splitted in groups less than 10 min, less than 20 min, less than 30 min, more than 30 minutes
13		Accessibility to public transport systems	• Ratio of citizens which live 300-500m resp. more than 500m distant to the closest public transport station with at least 5 times service in both directions
14	Social Infrastructure	Kita-Places	• Number of places in children day care center (Kita) per inhabitants under 6 years
15		Service for seniors	• Average waiting time for stationary place in a rest home
16	Housing	Housing costs	• Average costs per qm ² in rented accommodations
17			• Ratio of recipients of housing allowance in whole population
18	Environment	Public Green and recreation areas	• Ratio /Percentage of green and recreation areas compared with total area
	Security and Rescue	Street Crimes	• Number of street crimes per 1000 Inhabitants • House breakings per 1000 Inhabitants

Univ.-Prof. EoE Dr.-Ing. Holger Magel Athens 9 November 2018 32

Indicators for measuring the dimension

Equality of opportunities			
21	Education	School leavers without grade	<ul style="list-style-type: none"> Ratio of School leavers without certificate of secondary education in all school leavers per home city of the pupils
22		School leavers with A level	<ul style="list-style-type: none"> Ratio of school leavers with A level in all school leavers per home city of pupils
23		Distance to schools	<ul style="list-style-type: none"> Ratio of pupils with public transport way to school in groups „less than 20 /30/40/more than 40 minutes to nearest junior high school and grammar school
24	Job market	Underemployment	<ul style="list-style-type: none"> Ratio of underemployed people in working population
25		Long term unemployment	<ul style="list-style-type: none"> Ratio of long term jobless People (more than 1 year) in jobless people
26			<ul style="list-style-type: none"> Development of long term unemployment in a time span of 5-10 years
27		Precarious employment	<ul style="list-style-type: none"> Ratio of precarious or atypical employments in existing jobs which are subject to social insurance contribution Training positions per 1000 applications
28		Apprenticeship training position	<ul style="list-style-type: none"> Ratio of employees with commuting time more than 30 min/60 minutes
29		Commuting ratio	
30	Equal opportunities	Work seeking women	<ul style="list-style-type: none"> Ratio of jobless plus work seeking women in working age women
31		Income difference	<ul style="list-style-type: none"> Income difference between employed men and women

Univ.-Prof. EoE Dr.-Ing. Holger Magel Athens 9 November 2018 33

How to implement the 4 dimensions of Territorial Justice by politics , policies and administrations?

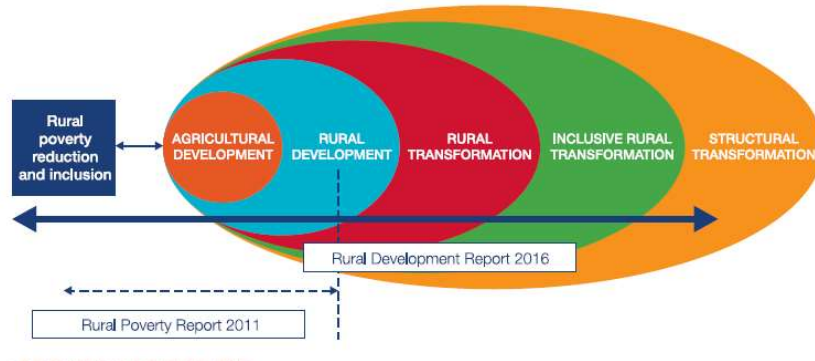

It depends on the country and it`s policies, goals, programmes ,strategies ,measures , institutions and governance mechanisms for guaranteeing and guiding the implementation of some kind of territorial justice.

Using the indicators of Territorial Justice can make the implementation much more transparent and suitable for monitoring the progress and for evaluating the result of having reached better equivalent living conditions.

Univ.-Prof. EoE Dr.-Ing. Holger Magel Athens 9 November 2018 34

IFAD`s Ideas about rural areas : What means structural transformation? It`s much more than agriculture and traditional rural jobs. Is it aiming at territorial justice?

China PM Li Keqiang

REPORT ON THE WORK OF THE GOVERNMENT

Delivered at the Fifth Session of the 12th National People's Congress of the People's Republic of China on March 5, 2017

“Our major areas of work for 2017

We will improve the mechanisms for encouraging **business startups and innovation in rural areas, support migrant workers in starting businesses in their hometowns and villages, and encourage college graduates, demobilized military personnel, and scientists and engineers to work in rural areas.**”

Expertise of German Institute of Economy (IW) made on behalf of the Bavarian Industry responding to the Inquiry Commission Report , October 2018

..In order to strengthen large companies in rural areas we have to improve location factors like **functioning infrastructure and modern mobility, digitization 4.0 (smart countryside, digital villages etc.) and beautiful villages and towns**

No concentration on agglomeration and economic centres only!

Univ.-Prof. EoE Dr.-Ing. Holger Magel Athens 9 November 2018 39

We need **smart und inclusive medium size - und small cities in rural regions** .Thus the shift of administrations ,universities and industry countryside will be successfull

Figure 1: The relation between smart city components and the SDGs
 Smart sustainable cities for all: A socio-spatial approach by Marya Mrabiee and Abbas Rajabifard
 In: Coordinates, Oct.2017 Smart sustainable cities for all

Univ.-Prof. EoE Dr.-Ing. Holger Magel Athens 9 November 2018 40

Why? Digitization opens new chances for exurban living and working

BAIN & COMPANY

Figure 2: High-density life may be economical, but people generally prefer low-density living

Spatial Economics: The Declining Cost of Distance

Over the next decade, the declining cost of distance will release those age-old constraints, making new combinations of distance, density and scale economically viable. Individuals may opt to live further from city centers, for example, as advances in transportation and connectivity allow them the abundant space of a rural town combined with many of the employment options, goods and services once available only in cities (see Figure 2).

Univ.-Prof. EoE Dr.-Ing. Holger Magel Athens 9 November 2018 41

The Bavarian Way , called „Homeland Strategy“

- 5 -

III. Die „Heimatstrategie“

Die **Heimatstrategie** ist ein neues Kapitel für die künftige Strukturentwicklung Bayerns und prägt die Landesentwicklungspolitik. Zielrichtung ist: „**Aktivieren statt alimentieren**“. Da gerade die gewerbliche Regionalförderung durch die Europäische Union (EU) in stärker entwickelten Gebieten zusehends eingeschränkt wird, braucht es eine Erneuerung der Landesentwicklung. Strukturschwache Kommunen im Freistaat sollen die Chance haben, aus eigener Kraft stark zu werden. Die **Heimatstrategie**, die die zentralen strukturpolitischen Instrumente im Zuständigkeitsbereich des Staatsministeriums der Finanzen, für Landesentwicklung und Heimat umfasst, besteht aus **fünf Säulen**:

1. Kommunalen Finanzausgleich
2. Strukturentwicklung für ganz Bayern
3. Breitbandausbau und E-Government
4. Nordbayern-Initiative
5. Behördenverlagerung

5 pillars:

1. Adjustment of Municipal Financial compensation between urban and rural municipalities
2. Spatial Development Strategy (e.g. new order and number of **central places**; **urban – rural cooperation**; **contributions of all line ministries e.g. Rural Development, Regional Development Fund ,Social, Education and Health funds etc**)
3. ICT initiative (Internet) and E government (Digitizing)
4. Northern Bavaria Initiative (esp. In the sector of University branches ,culture, job creation, urban and rural development)
5. Decentralization by dislocation of government offices and parts of universities from larger or central cities into rural areas

Univ.-Prof. EoE Dr.-Ing. Holger Magel Athens 9 November 2018 42

Bayernkurier of 9.10.2018

Hinter der Staufalle

Bayern richtet erste Behördensatelliten in Bad Aibling, Aichach, Altötting, Landsberg und Schwandorf ein, um zwei Ziele zu erreichen: Den Pendlerverkehr in die Großstädte zu reduzieren und die Vereinbarkeit von Familie und Beruf zu fördern.

Der Ministerrat hat das von Finanz- und Heimatminister Albert Füracker vorgelegte Konzept „Behördensatelliten“ verabschiedet. „Wir wollen die Vereinbarkeit von Familie und Beruf fördern und gleichzeitig Pendlerströme reduzieren“, stellte Ministerpräsident Markus Söder im Rahmen der Kabinettsitzung klar.

”

„Wir wollen, dass die Menschen Zeit mit der Familie verbringen, statt auf der Straße oder im Zug.“

— Markus Söder
