## INTRODUCTION

- As the largest archipelago country in the world, the management of Indonesia's marine and coastal territory has not been comprehensively done.
- Marine and coastal area has not been administered more carefully.
- Traditional management system is still functioning, in other it is to be growing weaker or has disappeared entirely.
- One obstacle to maintenance and development of effective management customary institution in Indonesia is that the government does not fully recognize or support such institutions.
- Is it possible to be integrated of institution schemes between traditional and modern government structure?

## RESULT

- Custom areas could be protected effectively by traditional institution for sustainability development.
- To maintain Unity of Republic of Indonesia, modern government structure should be recognized by the whole people of Indonesia.
- Integrated structure contributed to local institutional sustainability
