FIG WORKING WEEK 2012

May 6–10 2012
Rome, Italy

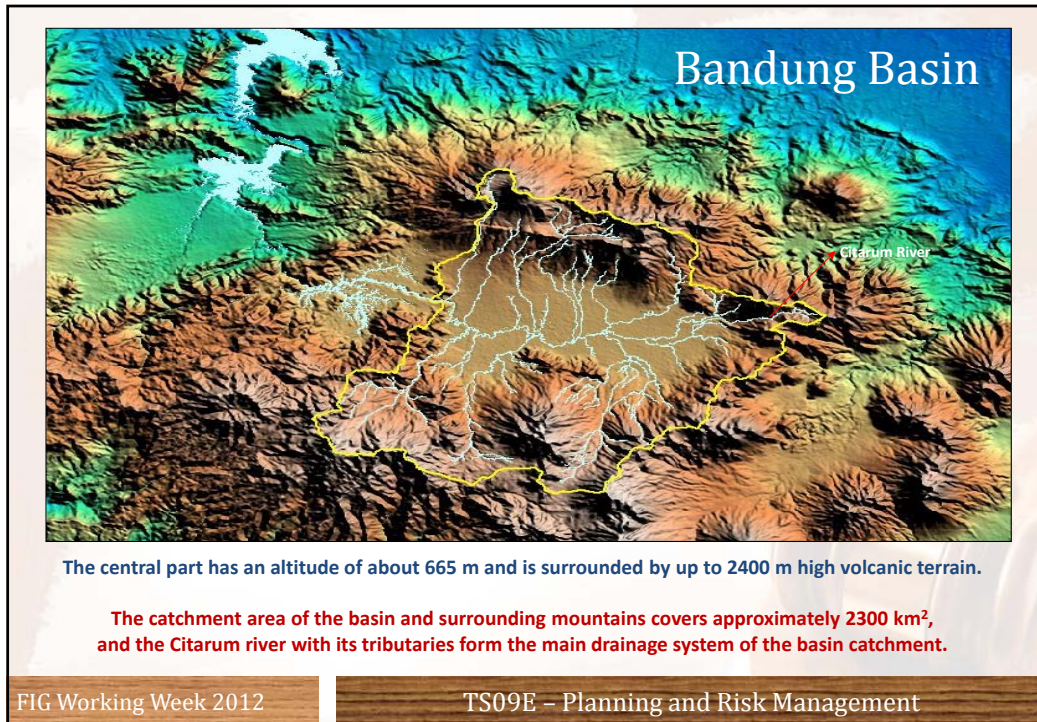

Institut Teknologi Bandung

BANDUNG
West Java
Indonesia

Hasanuddin Z. Abidin, 2011

Geodetic Methods for Land Subsidence Monitoring

City	Leveling	GPS	InSAR	Gravity
Jakarta	Since 1982	Since 1997	Since 2005	Since 2008
Bandung	Limited	Since 2000	Since 2007	Since 2008
Semarang	Since 1999	Since 2008	Since 2007	Since 2002

GRD of ITB mainly involved with GPS Surveys and InSAR.

Hasanuddin Z. Abidin, 2009

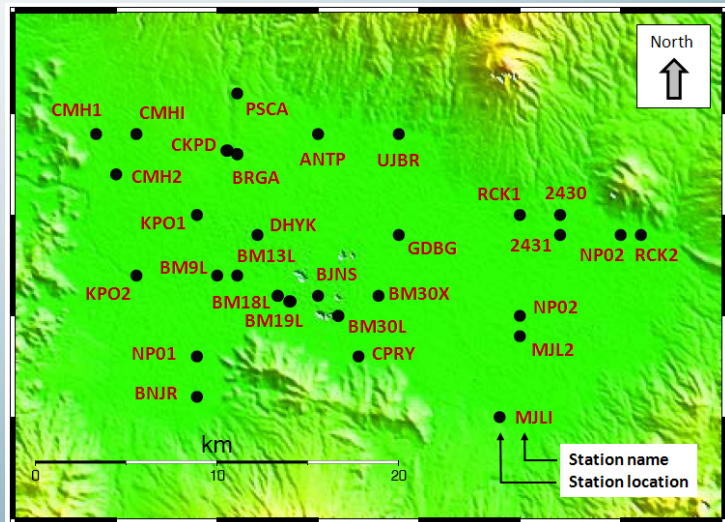

Types of Land Subsidence

- subsidence due to groundwater extraction,
- subsidence induced by the load of constructions (i.e. settlement of high compressibility soil),
- subsidence caused by natural consolidation of alluvium soil, and
- tectonic subsidence.

Hasanuddin Z. Abidin, 2006

GPS NETWORK FOR MONITORING LAND SUBSIDENCE in BANDUNG BASIN

- S-1 : Feb. 2000
- S-2 : Nov. 2001
- S-3 : July 2002
- S-4 : June 2003
- S-5 : June 2005
- S-6 : Augt 2008
- S -7 : July 2009
- S-8 : July 2010
- S-9 : August 2011

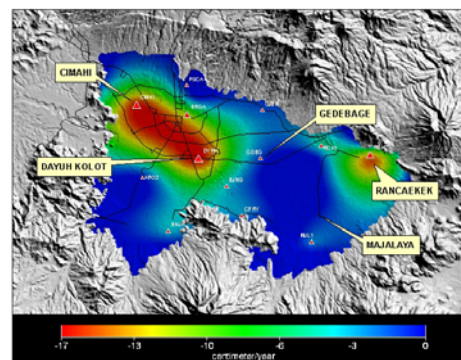

Hasanuddin Z. Abidin, 2012

GPS-DERIVED LAND SUBSIDENCE IN BANDUNG (1)

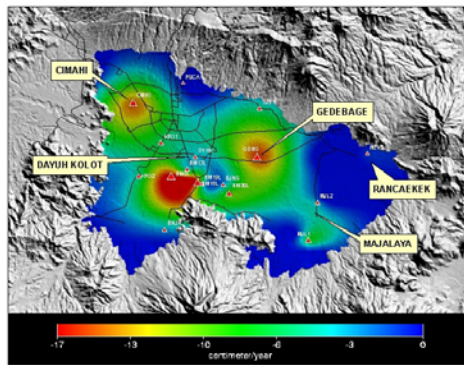

Feb. 2000 – Nov. 2001

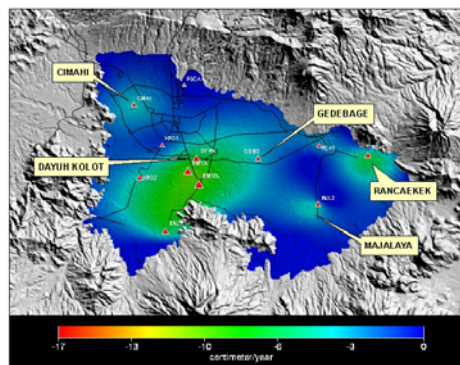

Nov 2001 – July 2002

Hasanuddin Z. Abidin, 2011

GPS-DERIVED LAND SUBSIDENCE IN BANDUNG (2)

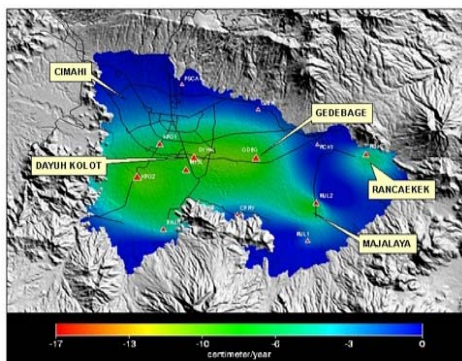

July 2002 – June 2003

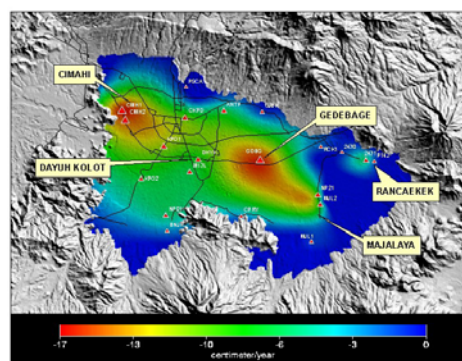

June 2003 – June 2005

Hasanuddin Z. Abidin, 2011

GPS-DERIVED LAND SUBSIDENCE IN BANDUNG (3)

June 2005 – Augt 2008

Augt 2008 – July 2009

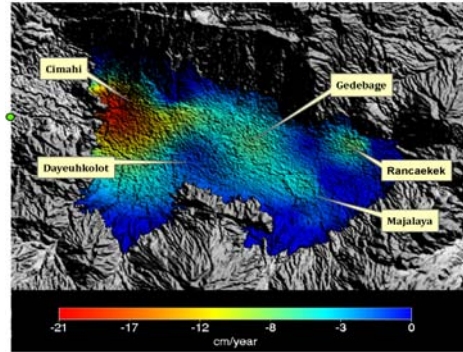

Hasanuddin Z. Abidin, 2011

GPS-DERIVED LAND SUBSIDENCE IN BANDUNG (4)

BANDUNG SUBSIDENCE RATE
July 2009 – July 2010

BANDUNG SUBSIDENCE RATE
July 2010-August 2011

Hasanuddin Z. Abidin, 2011

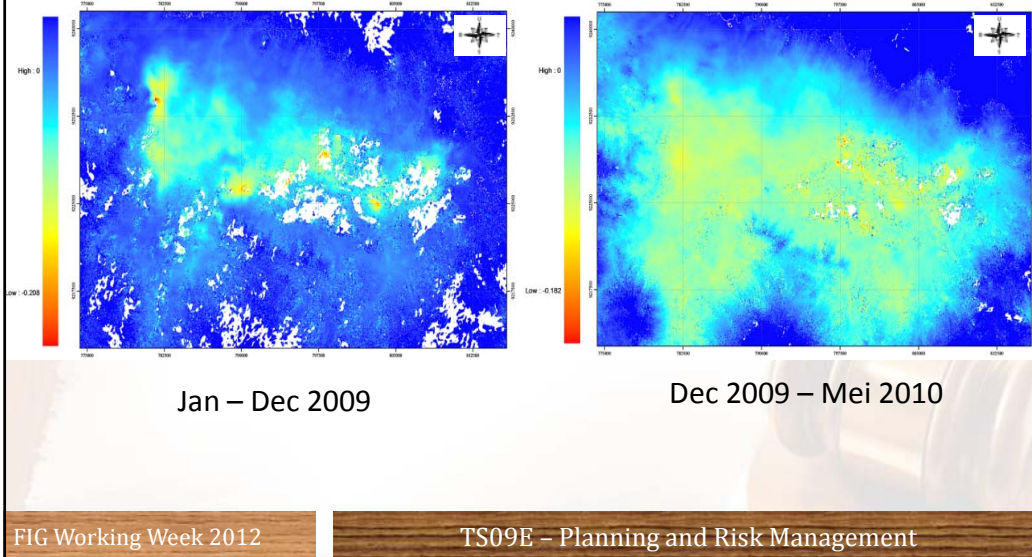

Land Subsidence measured by InSAR

There are 7 ALOS PALSAR images were processed in this case

No	Date	Orbit Direction	Sensor Type
1	06 March 2007	Ascending	Fine Beam Sensor
2	14 January 2007	Ascending	Fine Beam Sensor
3	18 April 2009	Ascending	Fine Beam Sensor
4	28 January 2009	Descending	Fine Beam Sensor
5	16 December 2009	Descending	Fine Beam Sensor
6	3 Mei 2010	Descending	Fine Beam Sensor

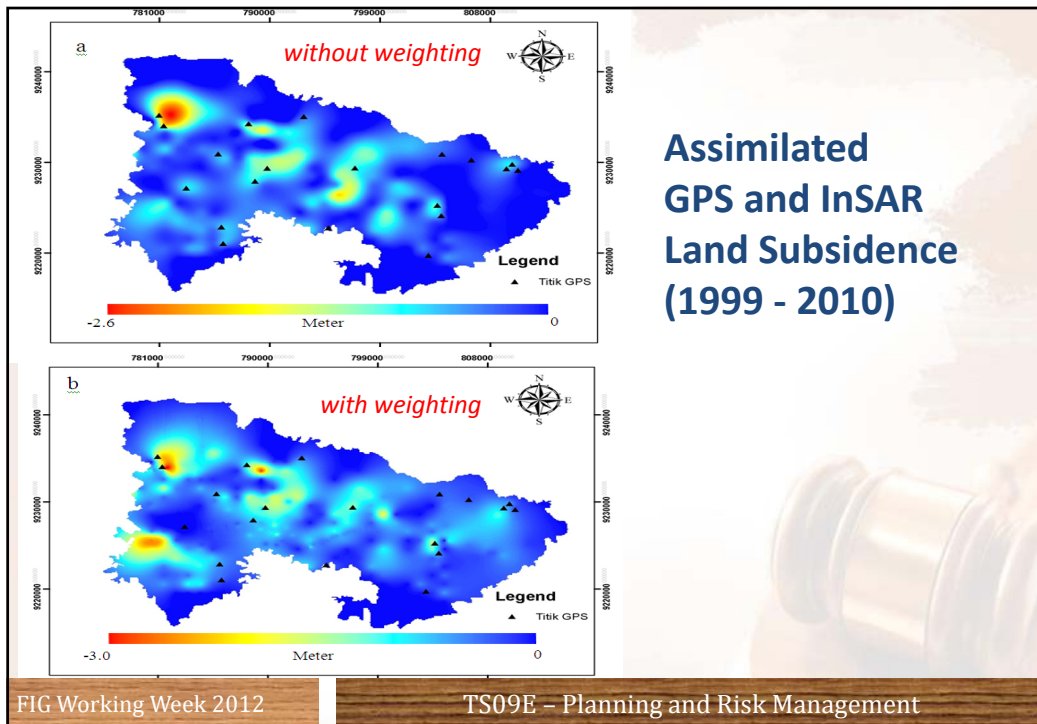

InSAR processing has been performed using GAMMA software

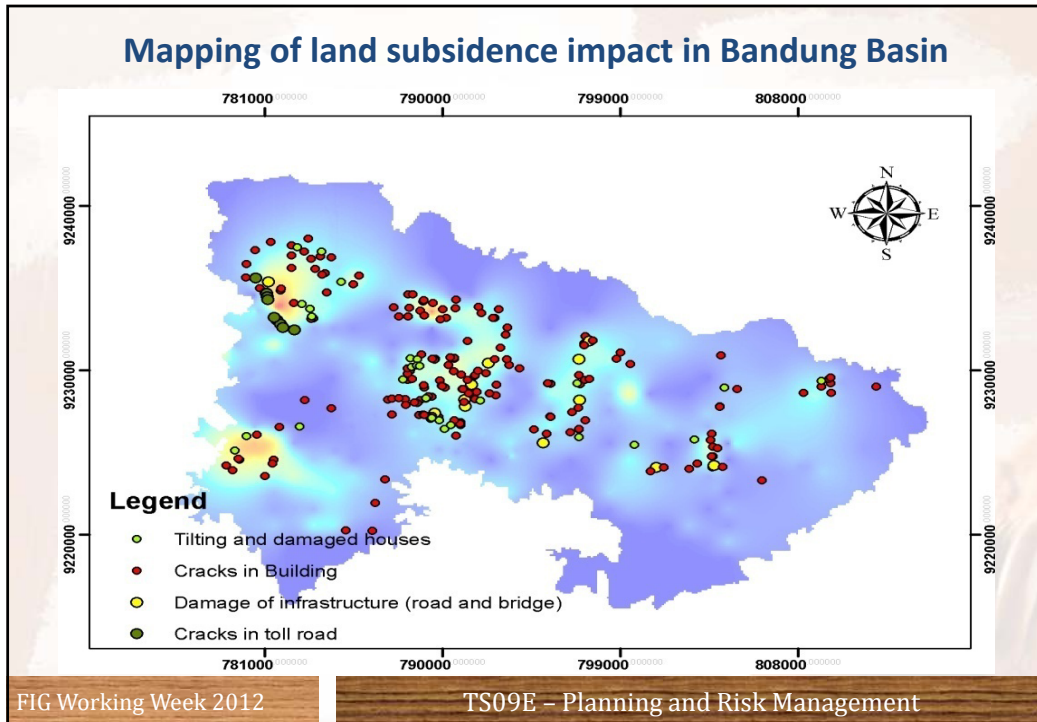

Land Subsidence derived by InSAR, 2008-2010

Assimilating GPS and InSAR derived subsidence

$LS_{ij} = f_{ij} LS_{ij}^{InSAR}$ $f_{ij} = \sum_{k=1}^N W_{ij}^k f_k(\theta, \phi)$ $W_{ij}^k = \begin{cases} \frac{1}{r_k^2} & \text{for } r_k \leq 15 \text{ km} \\ \sum_l \frac{1}{r_l^2} & \text{for } r_k > 15 \text{ km} \\ 0 & \end{cases}$ $f_k(\theta, \phi) = \frac{LS^{GPS}}{LS^{InSAR}}$	<p>LS_{ij} : Land subsidence value at each point of the model grid (i, j)</p> <p>LS_{ij}^{InSAR} : Land subsidence value each point of the model grid (i, j)</p> <p>W_{ij}^k : weighted coefficient with respect to distance r of the GPS station k (r_k) to the grid point</p> <p>LS^{GPS} : Land subsidence derived by GPS</p> <p>f_k : The multipliers for each of the GPS stations</p> <p>r_l : represent the distance of all relevant stations, i.e. the ones within 15 km (denoted with l)</p>

Impacts of Land Subsidence in Bandung (2)

G: Dayeuh Kolot
J: Gedebage

H: Cimahi
K: Leuwigadjah

I: Gedebage
L: Dayeuh Kolot

Hasanuddin Z. Abidin, 2011

EVIDENCE OF LAND SUBSIDENCE IN BANDUNG (Cimahi)

Hasanuddin Z. Abidin, 2011

EVIDENCE OF LAND SUBSIDENCE IN BANDUNG (Dayeuh Kolot)

Gumilar (2011)

Shortened distances from the roof and street to the floor

Hasanuddin Z. Abidin, 2011

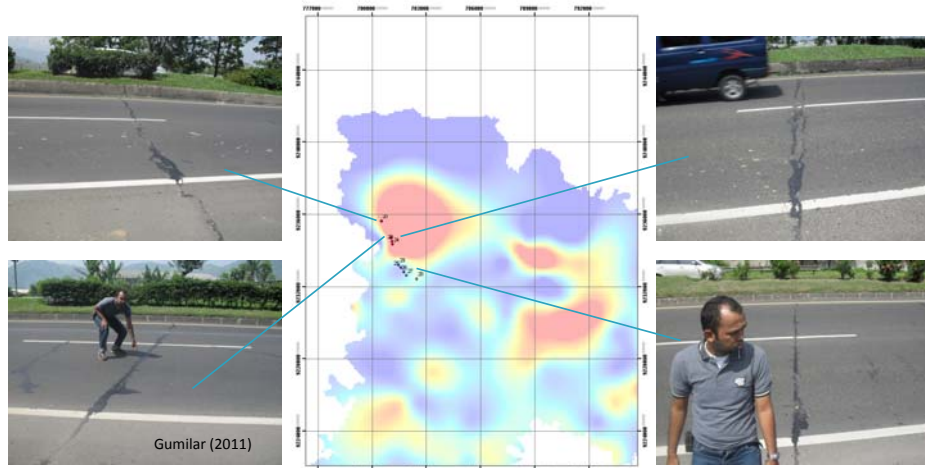

EVIDENCE OF LAND SUBSIDENCE IN BANDUNG (Gede Bage)

Gumilar (2011)

Shortened distances from the roof to the floor and the street to the floor

Hasanuddin Z. Abidin, 2011

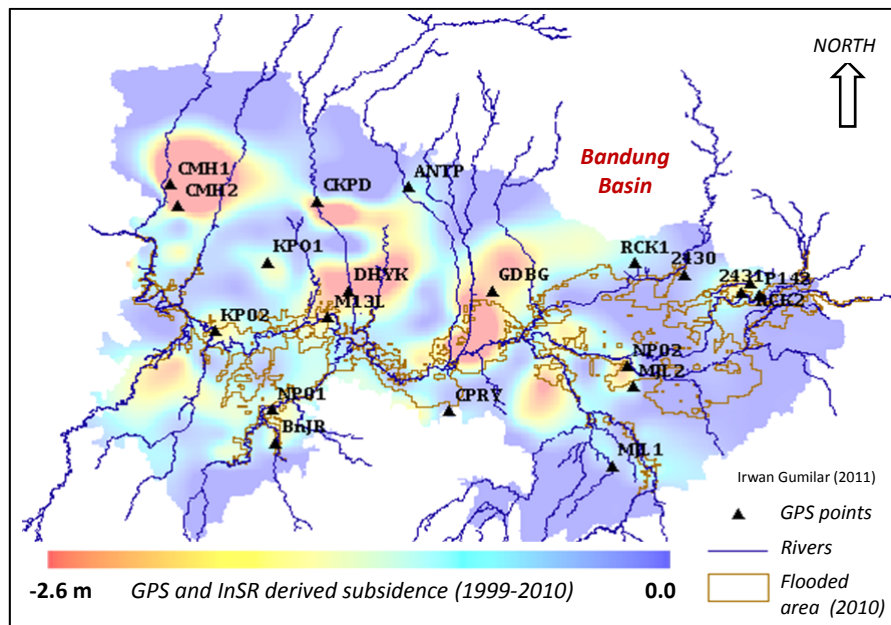

EVIDENCES OF LAND SUBSIDENCE IN BANDUNG BASIN

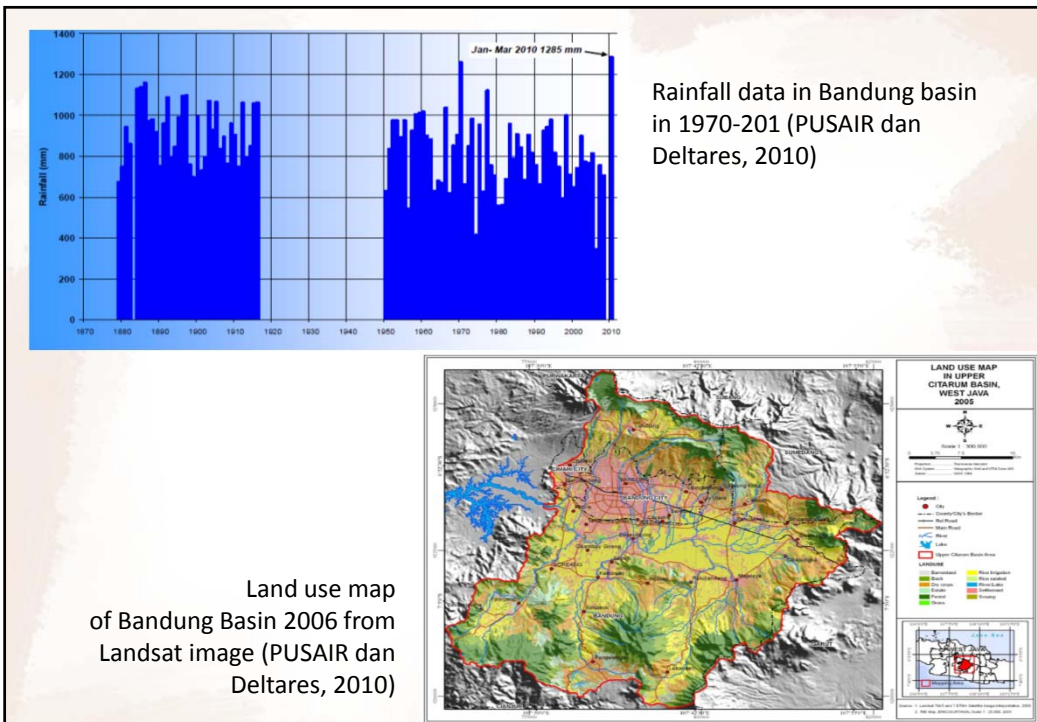

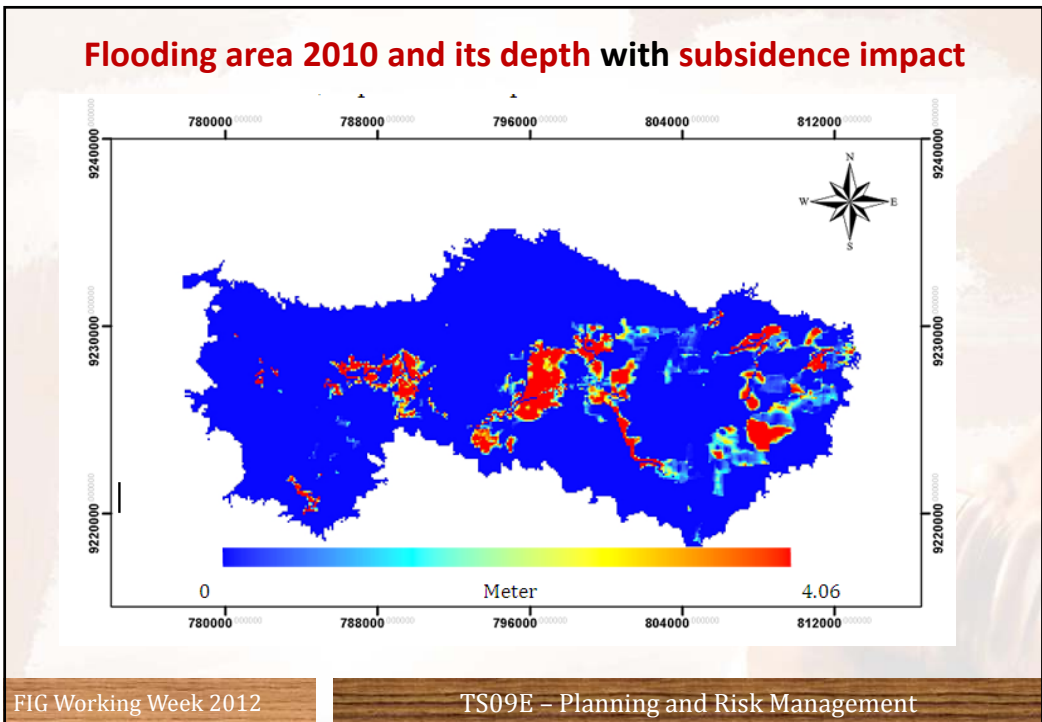

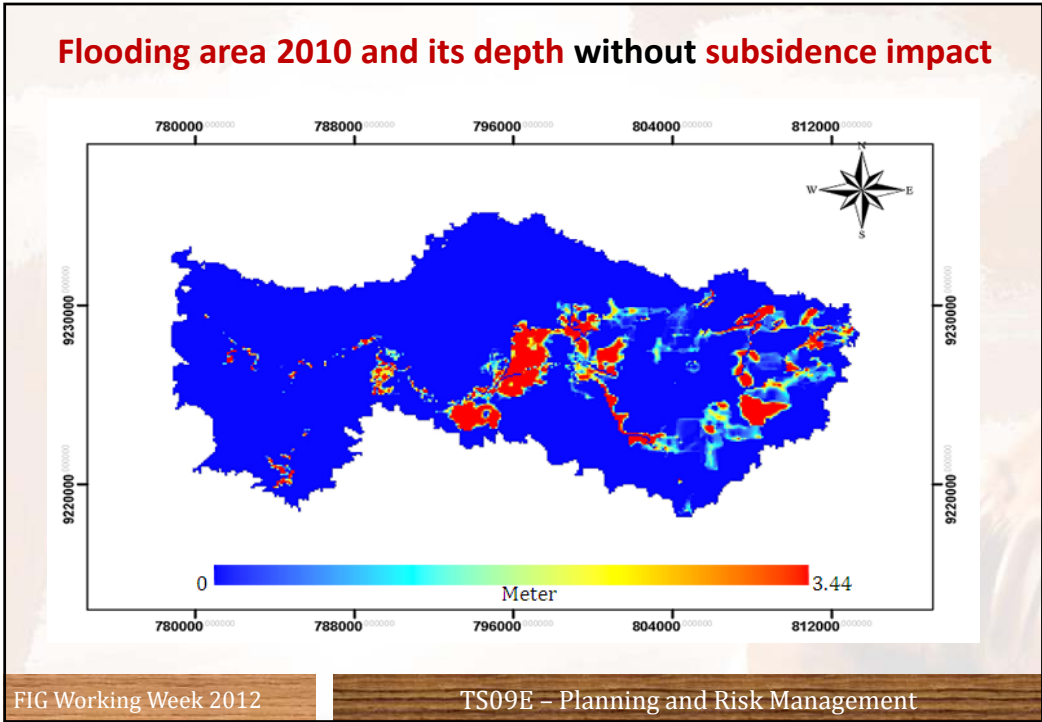

Crack on the highway (TOL Padalarang Cileunyi – Kilometer Pasirkoja)

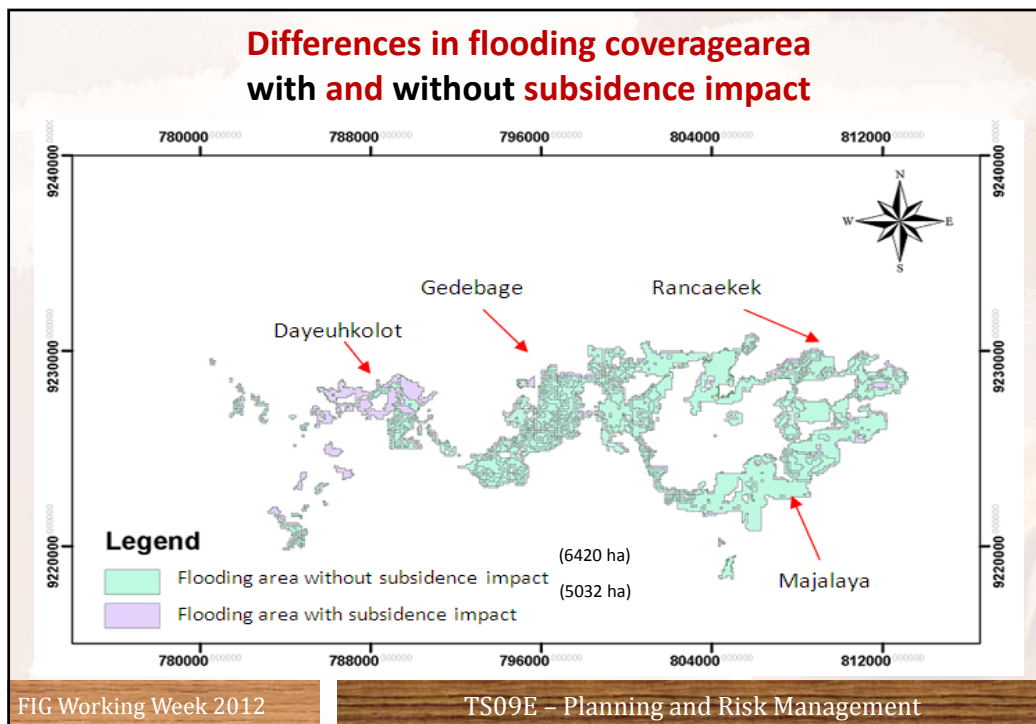

Hasanuddin Z. Abidin, 2011

Land Subsidence and Flooding in Bandung Basin

Closing Remarks (1)

- Significant subsidence in Bandung basin occurred in the textile industry area, where very large volumes of groundwater are usually extracted.
- Land subsidence in Bandung =
 $f \{ \text{excessive groundwater abstraction, building load (??), tectonics activity (??), natural compaction (?)} \}$
- Further research is needed to clarify the real mechanism and pattern (spatial and temporal) of land subsidence phenomena in Bandung basin.

Hasanuddin Z. Abidin, 2012
