PLATINUM SPONSORS

LCMS - System configuration

Laser profiling (principle)

“3D Time of Flight” vs. “3D Laser Triangulation”

LiDAR

LCMS

| Specifications | Lidar | LCMS |
|----------------------------------|----------------|-------------------------|
| Acquisition Rate | 200 profiles/s | 5,600-28,000 profiles/s |
| Range Accuracy/Resolution | 5 to 20 mm | <i>0.25mm / 0.1mm</i> |
| Lateral Resolution | 10 mm ++ | 1mm (FOV = 4m) |
| Number of points/s | 1 MHz | 45 MHz (3D and 2D) |
| Range | 3 to 1000 m | 3 m |

The importance of road smoothness

- **Very wavy roads:**
 - 30-40% increase of wear of road
 - Vertical acceleration increases dynamic load impact of traffic
 - Self destruction of bumpy road surfaces
- **Driving comfort**
- **Fixed depth milling operations do NOT improve the longitudinal road profile**

Control Points Only

1. LCMS system

- 2 Laser profilers (4 meters field of view)
- 2 Inertial Measurement Units (IMU)
- Distance Measuring Instrument (DMI)

2. Applanix POS-LV 420

- Optical encoder (DMI)
- Inertial Measurement Unit (IMU)
- GNSS

- Asphalt
- Concrete
- Gravel

Complex Vehicle Dynamics

- Survey**

- Processing**
 - Navigation solution
 - Controls Points
 - Stitch lanes

- Data Exportation**

LDTM Calibration

1 - Scan of the calibration validation object

2 – Stop and GO

3 – Measurement of the position of the sensors

Done only once during sensors installation

LDTM Calibration

LDTM Survey

Data Processing

Control Points

Tie Points

Applying Solutions

Data Exportation (LAS)

Ground Control Points

- Surveyed using a robotic total station
- One point every 300 to 1000 meters on road surface or shoulder
- Converted in UTM
- Imported in LCMS-PV3D software

Multiple runs - Average error compare to GT

| | | | |
|--------------------------------------------|--------|--------|--------|
| Accuracy compare to GT (Avg. in mm): | X: 5.0 | Y: 4.0 | Z: 2.5 |
| Repeatability compare to first scan (mm)*: | X: 3.0 | Y: 5.0 | Z: 2.0 |

*Mean of RMS Error over 12 scans

Multiple runs - Average error compare to GT

| | | | |
|---------------------------------------------|--------|--------|--------|
| Accuracy compare to GT(Avg. in mm): | X: 9.0 | Y: 7.0 | Z: 5.0 |
| Repeatability compare to first scan (mm)* : | X: 6.0 | Y: 6.0 | Z: 4.0 |

*Mean of RMS Error over 12 scans
