

LISAG, Tracing the Past and Charting a Strategic Path for a Better Tomorrow

John AYER (Ghana)

Key words: Keyword 1; Keyword 2; Keyword 3

SUMMARY

As we delve into our history, we find tales of passionate surveyors, who had dedicated their lives to the precision of our craft. They had meticulously measured with more embryonic equipment but achieved results we cannot parallel today even with our more advanced and sophisticated modern equipment. They mapped, analysed the results and produced databases in the form of maps and plans in order to create a Nation for us with borders and laid the foundation for our relevance in National Development and the impact of our Association.

We cannot fail to mention, George Ekem Ferguson who was the first Gold Coast Surveyor that the British sent for training in 1889 at the Royal School of Mines and Geographic Society in London and trained in Geology, Ethnology and Surveying.
